PRODUCT INFORMATION

GRIFFIN 14-7-7 is a nutrient solution containing highly soluble forms of elements essential to plant growth, crop development, crop quality, and yield.

DUAL PHOS is formulated with Dipotassium Phosphate (DKP).

- DKP has a very low salt index and can be safely applied at higher rates than many other products.
- DKP provides readily available phosphorus as PO₄. At critical stages of plant growth, DKP enables the grower to bypass certain soil & environmental conditions that limit phosphorus uptake.
- DKP is much more soluble than potassium nitrate, therefore the DKP stays in solution on the leaf much longer—an essential requirement for foliar potassium uptake.

DUAL PHOS includes phosphorous and phosphoric acid. Research has demonstrated that combining phosphates and phosphites in a single application is an innovative and superior method. The dual application provides a synergistic effect in which the inherent qualities of both products are amplified.

Foliar Nutritional Spray - DUAL PHOS may be applied by air or with all types of ground spraying equipment.

Compatibility - DUAL PHOS is compatible with most common foliar pesticides and nutrients. However, USER ASSUMES FULL RESPONSIBILITY to ensure compatibility when tank mixing with other products.
