PRODUCT INFORMATION

GRIFFIN GREEN SOIL TREATMENT a proprietary nutrient solution containing two highly soluble forms of elements essential to plant growth, crop development, crop quality, and yield. These elements are in the correct ratios to provide the building blocks for the complex enzymatic reactions essential to overall plant health. This product is formulated with Dipotassium Phosphate (DKP).

- DKP has a very low salt index and can be safely applied at higher rates than many other products.
- DKP provides readily available phosphorus and potassium.

GRIFFIN GREEN SOIL TREATMENT also includes Soil-Set® from Alltech® Crop Science. Soil-Set® is a natural fermentation product designed to aid in the optimization of soil microbiology, and to systematically enhance the plant's ability to defend itself from disease. **GRIFFIN GREEN SOIL TREATMENT** contains humic and fulvic acids which enhance the soil's capacity to attract and hold essential nutrients and aid in neutralizing toxins in the soil.

Compatibility - GRIFFIN GREEN SOIL TREATMENT has a neutral pH and is compatible with most common foliar pesticides and nutrients. However, USER ASSUMES FULL RESPONSIBILITY to ensure compatibility when tank mixing with other products.
